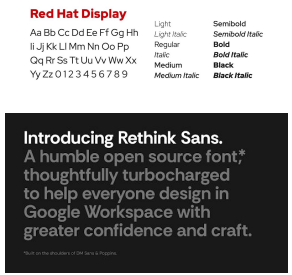
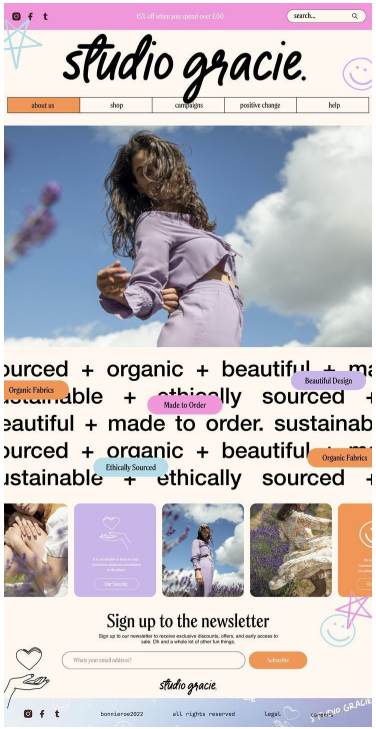
[portfolio website inspiration - pinterest]





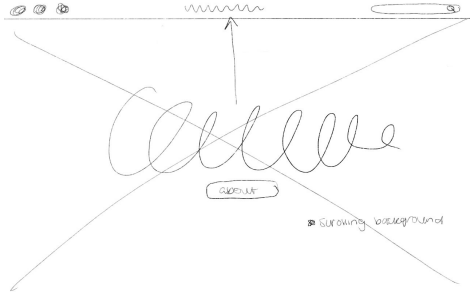
[byline]

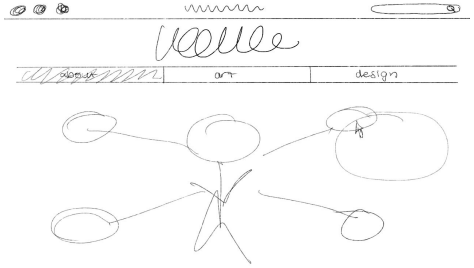
concepts|skills	
learned	**need to learn**
○ navbar - hover animations ○ transform & transformations - unified hover animations ○ media queries - resizing images & descriptions ○ definitely much more	○ scrolling background for main page ○ scrolling gallery on hover ○ phone vs computer - hover ○ border + description on image when selected ○ animated buttons ○ popup message? ○ definitely much more

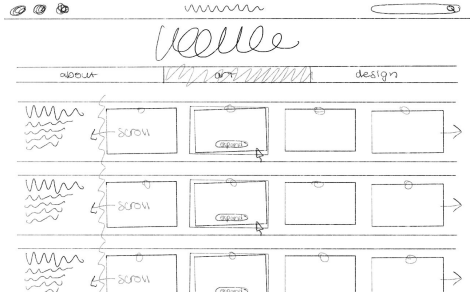
midterm progress

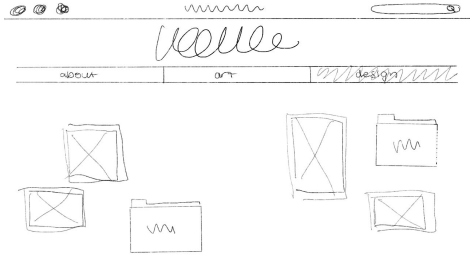
wireframe/sitemap

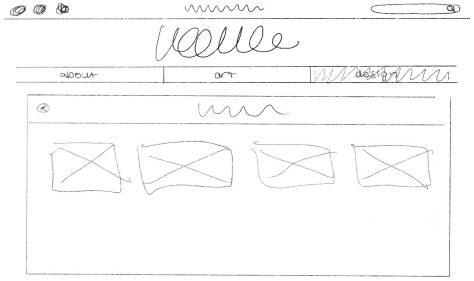
- home
  - scrolling background
- about
  - clickable things
- art
  - collections in scrolling galleries
- design
  - projects in folder layout
- contact
  - email/form
  - social media

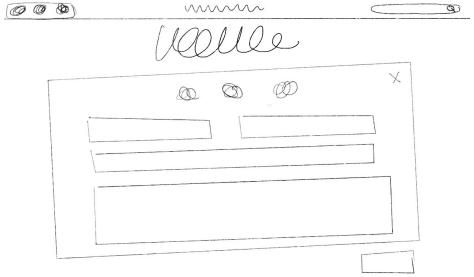












code figured out

```
li a:hover {
  color: #ff4000;
  animation: wiggle 0.5s ease-in-out;
}
```

example ^ of keyframes applied to hover

```
/* wiggle animation */

@keyframes wiggle {
  0% {
    transform: rotate(0deg) translate(0, 0);
  }
  25% {
    transform: rotate(-5deg) translate(-5px, -5px); /* up & left */
  }
  50% {
    transform: rotate(5deg) translate(5px, -10px); /* up & right */
  }
  75% {
    transform: rotate(-5deg) translate(-5px, -5px); /* back up & left */
  }
  100% {
    transform: rotate(0deg) translate(0, 0); /* original position */
  }

}
```

used keyframes rule to get a unified unique animation across all desired hover states

next steps

- scrolling background on opening page
- colors
- more/better media queries
- make more interactive, scrolling/galleries
- add info sections for each project
  - flipping cards
- more organized code
